

VIN

COMPANY  
PROFILE

## About Us

VIN is a holding company that manages and supports a group of independent businesses across Indonesia's vital industries, including energy, natural resources, agriculture, logistics, maritime infrastructure, and renewable energy.

Founded with a focus on coal trading, VIN has evolved into a multi-sector platform that drives growth through strategic oversight, investment, and shared values.

Our portfolio includes companies in coal and andesite mining, palm fruit supply, diesel distribution, equipment rental, shorebase operations, ship-to-ship transfer, and solar energy.

At VIN, we empower each subsidiary to operate independently while aligning with a common vision: to create sustainable value, strengthen national industry, and build a resilient future for Indonesia.

## Words From Our CEO

At VIN, we began with a single vision — to build a trusted trading company rooted in Indonesia's rich natural resources. What started as a coal trading business has now grown into a diverse group of companies across energy, mining, agriculture, logistics, and infrastructure.

This transformation has been both deliberate and driven by a belief that long-term value comes from adaptability, strategic investment, and responsible growth.

**Ario Bimo**  
CEO of VIN

"I believe our strength lies in the synergy between businesses, the integrity of our people, and our unwavering commitment to progress. Together, we will continue building a resilient and forward-looking group that contributes to a stronger Indonesia."

As a holding company, our role is more than ownership — we are enablers of excellence. Each of our subsidiaries operates with entrepreneurial freedom, while benefiting from the strategic oversight, operational support, and shared values that VIN provides.

We recognize the critical role our businesses play in Indonesia's economic development, from powering industries with coal and solar energy to moving goods, building infrastructure, and supporting agriculture. As we look to the future, we are committed to operating sustainably, empowering our people, and investing in solutions that create meaningful impact.

**Ario Bimo, CEO of VIN**

## Vision

To be Indonesia's leading strategic holding company, empowering sustainable growth across energy, infrastructure, and natural resource industries.

## Mission

To build, support, and scale impactful businesses that drive Indonesia's growth across energy, natural resources, and infrastructure—through strategic management, responsible investment, and a commitment to sustainability.

## Value

“EARTH” | Effort, Attitude, Responsibility, Trust and Habit

## Company Value

### Effort

Striving to manage natural resources for people's welfare. We champion the equitable distribution of benefits derived from natural resources, ensuring a just transition to a more sustainable future that enhances the lives and livelihoods of all citizens.

### Attitude

Preserving the environment proactively. Emphasizing Foresight: We advocate for a forward-thinking approach to environmental protection, implementing preventative measures and innovative solutions to safeguard our ecosystems for future generations.

### Trust

We believe trust is the cornerstone of strong relationships. This allows us to build credibility with our employees, clients, and partners. We foster a sense of accountability by taking responsibility for our actions and decisions, demonstrating that we are worthy of the trust placed in us.

### Responsibility

Taking responsibility for environmental sustainability and community well-being. We embrace the role of stewards, taking full responsibility for ensuring the environmental sustainability of our operations and actively contributing to the well-being of the communities in which we operate.

### Habit

Developing a habit of constantly adapting to the environment. We cultivate a culture of agility and resilience, fostering a continuous learning environment that allows us to adapt our strategies and practices in response to evolving environmental conditions.

# Our Business

## Vin Royal Energi | VRE

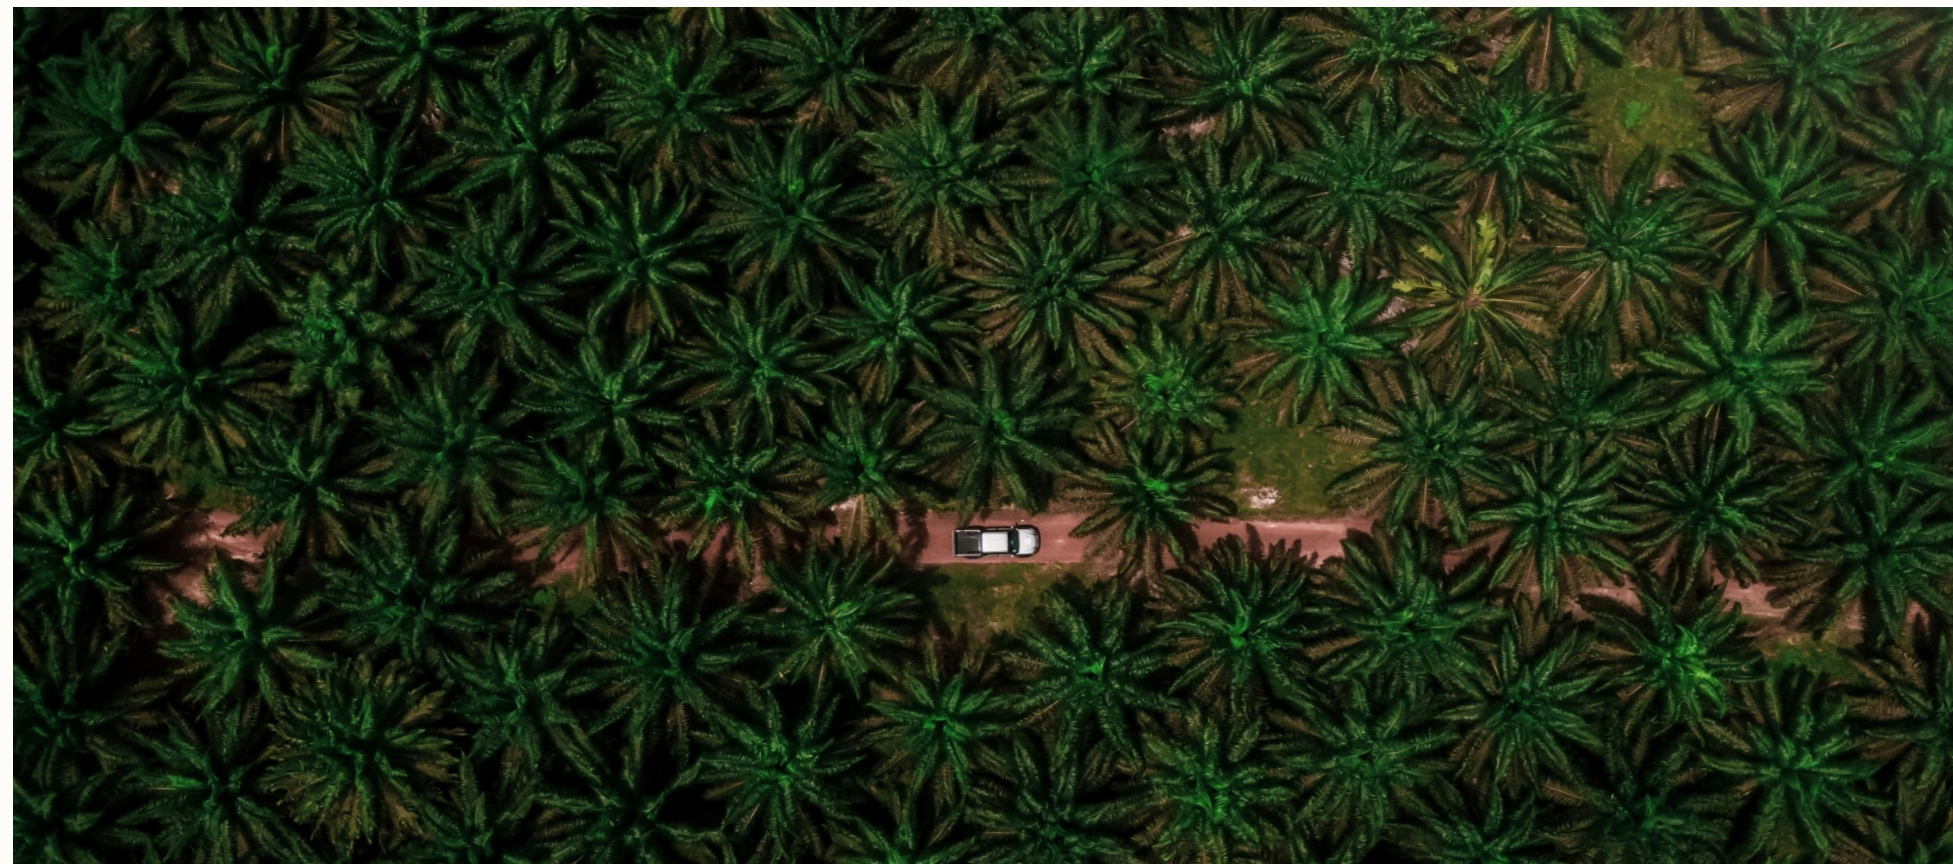

VIN Royal Energi is the founding business of VIN, engaged in the trading and supply of coal. The company owns and operates the Buana Eltra coal mine, ensuring a stable, high-quality supply to both domestic and international markets.

It plays a vital role in supporting Indonesia's energy sector through reliable coal distribution

## Vin Bhumi Lestari | VBL

VIN Bhumi Lestari specializes in the procurement and supply of fresh fruit bunches (FFB) to palm oil factories. By bridging smallholder producers and palm oil mills, the company contributes to the efficiency and traceability of Indonesia's palm oil industry

## Nimbus Persada Sriwijaya | NPS

Nimbus Persada Sriwijaya provides truck and heavy equipment rental services to support mining, agriculture, construction, and industrial operations. With a reliable fleet and responsive support, it enables partner companies to scale their logistics and site operations efficiently.

## Vin Inti Ancaya | VIA

VIN Inti Ancaya operates in the trading of andesite stone, a crucial material for infrastructure and construction projects. The company owns the Sumber Cipta Graha andesite mine, allowing it to control quality, availability, and pricing throughout the supply chain.

## Ichlas Energi Persada | IEP

Ichlas Energi Persada focuses on the distribution and supply of diesel fuel to various sectors, including mining, logistics, and construction. With efficient sourcing and delivery capabilities, it ensures energy reliability for operational continuity across the value chain.

## Benua Laut Lepas | BLL

---

Benua Laut Lepas owns and manages a Ship-to-Ship (STS) transfer concession area, enabling offshore transfer of cargo such as fuel and bulk materials.

The STS zone supports efficient maritime logistics and serves shipping operators looking for cost-effective, regulated transfer points.

## Bhakti Tirta Udaya | BTU

---

Bhakti Tirta Udaya manages a strategically located shorebase that supports offshore operations, marine logistics, and industrial storage. The shorebase acts as a logistical hub for loading, unloading, and storing goods, equipment, and fuel.

# Future Project Development

---

## Solar Farm

This is VIN's future venture into renewable energy, with plans to develop a solar farm focused on clean, sustainable power generation. This project reflects VIN's long-term commitment to environmental responsibility and energy diversification in Indonesia.

# Our Projects & Development

VIN’s projects reflect our commitment to strategic growth and long-term value across energy, resources, infrastructure and investment sectors through impactful driven execution.
